

## ComEd's Environmental Disclosure Statement

The disclosure of this information is required under Section 16-127 of the Electric Service Customer Choice and Rate Relief Law of 1997 and the rules of the Illinois Commerce Commission, 83 Ill Adm. Code 421.

Sources of Electricity Supplied for the 12 months ending December 31, 2002	Percentage of Total
Biomass power	0%
Coal-fired power	30%
Hydro power	0%
Natural gas-fired power	2%
Nuclear power	65%
Oil-fired power	0%
Solar power	0%
Wind power	0%
Other resources	0%
Unknown resources purchased from other companies	3%
TOTAL	100%

### Sources of Electricity Supplied for the 12 months ending December 31, 2002

<b>AVERAGE AMOUNTS OF EMISSIONS and AMOUNT OF NUCLEAR WASTE per 1000 kilowatt-hours (kWhs) PRODUCED from KNOWN<sup>‡</sup> Sources for the 12 months ending December 31, 2002</b>	
Carbon dioxide	662.39 lbs.
Nitrogen oxides	1.15 lbs.
Sulfur dioxide	1.49 lbs.
High level nuclear waste	0.0040 lbs.
Low level nuclear waste	0.0001 cubic feet

<sup>‡</sup>3% of the total electricity supplied was purchased from other suppliers and the amounts of emissions and amount of nuclear waste attributable to producing this electricity is not known and is not included in this table.

Additional information on companies selling electrical power in Illinois may be found at the Illinois Commerce Commission's World Wide Web site; [www.icc.state.il.us](http://www.icc.state.il.us).

The electric industry restructuring law passed in 1997 by the Illinois General Assembly provides many benefits for all customers. As part of this law electric utilities and suppliers are providing an Environmental Disclosure Statement for the twelve months ending every quarter.

The information on this statement shows the breakdown of the different sources that generated electricity for ComEd customers and the average amounts of emissions and nuclear waste produced, between 1/01/02 and 12/31/02.

For comparison purposes, the following shows the Midwestern states' (Illinois, Wisconsin, Michigan, Ohio and Indiana) electric utilities averages for sources of electricity generation and emissions for 1999.\* 65 percent of ComEd's electricity is generated by nuclear power, and another 2 percent is generated by natural gas-fired power. Both nuclear power and natural gas-fired power have lower emissions of carbon dioxide, nitrogen oxides and sulfur dioxide than coal-fired generation. Because of that, our emission rates are 60% less than the regional average for carbon dioxide, 82% less for nitrogen oxides, and 87% less for sulfur dioxide.

(Midwest Sources—rounded to the nearest whole percent)

Coal-fired power	75%
Hydro power	1%
Natural gas-fired power	1%
Nuclear power	22%
Oil-fired power	1%
Renewables	less than 1%
(includes geothermal, biomass, wind, solar, thermal and photovoltaics)	

(Midwest Emissions—pounds per 1000 kilowatt-hours)

Carbon dioxide	1,647.07 lbs.
Nitrogen oxides	6.35 lbs.
Sulfur dioxide	11.87 lbs.

### Fewer Air Emissions with Soy in Our Tanks

Most of us know soy as a nutritious food. But it's not just a great source of protein. It's also a source of cleaner burning fuel known as soy-based biodiesel. To help improve air quality in our region and promote biodiesel's mainstream viability, ComEd signed a purchase agreement last spring for 600,000 gallons of biodiesel for use in more than 2,000 ComEd vehicles, about 85% of the company's entire fleet.

All of ComEd's diesel vehicles now run on a 20 percent blend of biodiesel – the highest amount that can be run without impacting manufacturers warranties. Compared to standard diesel fuel, this new fuel emits 20 percent less sulfur dioxide, 14 percent less hydrocarbons and 9 percent less carbon dioxide.

Soy-based biodiesel is not currently available at the pump. ComEd's supply is stored and distributed at company terminals. ComEd hopes the purchase agreement – which represents roughly one-sixth of the Midwest region's biodiesel consumption and four percent of U.S. biodiesel consumption – will help drive down costs and encourage other Northern Illinois companies to use it.
